Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/14/2005 has been entered.

Claims 29-38 are pending. No claim is allowed at this time.

Response to Remarks Filed on September 14, 2005

- The Applicants' arguments were fully considered, but are not found persuasive. Therefore, the previous rejection is maintained.
- Upon further consideration and since Patent has been already issued, the double patenting rejection is maintained. The rejection is not obviousness rejection therefore; unexpected results cannot overcome double patenting rejection.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686

F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington,* 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 29-38 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 21-31 of DELUCA et al '410 (US Patent No. 5,945,410) and claims 27-37 of DELUCA et al '559 (US Patent No. 6,127,559). Although the conflicting claims are not identical, they are not patentably distinct from each other because presently claimed invention is obvious when, in the references, R6 is alkyl and R5 is H. Presently claimed compound contains a methyl group at R6 (in reference, it is an alkyl). The method of treating metabolic bone disease has been claimed in both references.

Presently claimed invention is drawn to a method of treating metabolic bone disease by the compound (20S)-1alpha-hydroxy-2alpha-methyl-19-nor-vitamin D_3, whereas the claims of the Patents cited above are drawn to the same method of treating metabolic bone disease.

It would have been obvious to one skilled in the art to prepare additional compounds useful for the treatment of metabolic bone disease because the reference teach the uses of these vitamin D compounds.
